## Projects

- SOOS** Nov 2025 - Present  
Internal ordering system for Scouting Zuiderkruis, rebuilt from a legacy platform. Full-stack web application with a Laravel backend and React frontend for managing food and drink orders, user balances, and payments (iDEAL, cash, bank transfer). Focused on maintainability, scalability, and mobile-friendly UX.  
<https://timvanderkloet.com/project/106/>
- Satisfactory Planner** April 2024 - Present  
A full-stack web application for tracking and managing Satisfactory production lines. Calculates resource flows and power consumption and visualizes production chains using interactive flowcharts. Built with a custom lightweight framework and a modern frontend, focused on clarity, automation, and efficient factory management.
